Atir Khan

Full Stack Web Developer

PROFESSIONAL SUMMARY

Dynamic full-stack web developer with a robust portfolio of solo and collaborative projects. Skilled in designing and developing scalable web applications using the MERN stack. Agile learner skilled in harnessing generative AI and swiftly adapting to new tech stacks. Adept at crafting dynamic web solutions, blending technical acumen with collaborative prowess to deliver impactful full-stack outcomes.

PROJECTS

1. Go-Fit (Fitness Class Booking App) | 🌐 | 📱

Node.js | Express | MongoDB | HTML5 | CSS3 | JavaScript

- Spearheaded the development of "Go-Fit," a high-performance web application enabling users to seamlessly book and manage fitness classes.
- Designed and implemented the Trainer's Dashboard for efficient class management.
- Crafted the user-friendly Class Creation and Class Update Pages.
- Collaborated closely with a team of 5 members, ensuring a successful project delivery within a tight 5-day timeline.

2. QR Code-Chimp | 🌐 | 📱

Node.js | Express | MongoDB | HTML5 | CSS3 | JavaScript

- Designed and developed "QrCode-Chimp," a QR code generator and scanner website
- Facilitated quick and efficient information sharing through QR codes
- Implemented features such as sign-up/sign-in, URL QR code generation, text QR code generation, and QR code scanning
- Solely responsible for the entire project, from concept to deployment, within a 5-day window.

3. Code Converter App | 🌐 | 📱

OpenAI API | Node.js | Express.js | HTML5 | CSS3 | JavaScript

- Developed the "Code-Convertor-app," a solo project, showcasing rapid learning and application of a new technology stack within a span of just 1 day.
- Implemented advanced features including Code Conversion, Code Debugging, and Code Quality Check, enhancing the app's utility and value.
- Incorporated the power of Generative AI by integrating the OpenAI API, elevating the project's capabilities and demonstrating innovation in problem-solving.
